

Information Technology & Network Administration

Associate of Science

Become a IT/Networking Professional!

Graduates who successfully completed the program will be awarded an Associate Degree in Information Technology and Network Administration and can either enter the workforce prepared for jobs such as PC support specialist, help desk technician, network and server administrators, or they can choose to further their education by transferring credits to baccalaureate programs in Applied Computer Science or Computer Science.

The Information Technology and Network Administration Program is both comprehensive and flexible, providing students with several career options and paths in the computer science field. Students who choose to continue on to four-year institutions are encouraged to select the higher-level mathematics (math at the level of Pre-Calculus is preferred).

River Valley Community College is a CISCO Networking Academy and utilizes CISCO curriculum to prepare students for CISCO CCNA Certifications.
