

# Liberal Arts

Associate of Arts

## SCIENCE CONCENTRATION

### Prepare For Four-Year Programs!

The Liberal Arts Associate of Arts with a Concentration in Science is designed for students who are interested in a science-related career, but are unsure of which specific sub-discipline in which they want to pursue. This program provides opportunities for students to explore a range of interests and to learn how science may be integrated with other fields. For example, a student interested in pursuing medical laboratory work concurrently with biology would have the option of taking medical laboratory courses as electives. This program enables transfer to four-year degrees.

Liberal Arts studies focuses on developing critical thinking and communication skills - which according to the National Association of Colleges and Employers, are highly sought after by employers. Therefore, students who complete the Liberal Arts Associate in Arts can choose between transferring into a baccalaureate degree program, or into their career.

### Careers & Degree Pathways
